LCD display alternates between time of day, volume remaining or days till regen and

The Aquatek Carbon Filter absorbs and removes unwanted contaminants and smells from water. The trapped contaminants are periodically flushed from the tank to a nearby drain. Units will be sized properly based on your home water test, size of home and water usage.

NOTE: Additional plumbing considerations must be made if there will be any faucets or spigots piped in before the filter tank.

An Aquatek Carbon Filter can be designed and manufactured to meet special applications.
